**Re: Projects with Window Consultants, Inc.**

Dear Mr. Downing:

Since our very first window replacement project with Baltimore County Public Schools in 2003 we have experienced a successful and professional working relationship with Window Consultants.

We have learned a great deal about the industry standards as they relate to windows, testing, manufacturer components and field conditions. Window Consultant's staff is a significant technical resource to our efforts to provide our clients with a quality design that meets client's expectations as well as providing a practical design for a product that works well with real life conditions. In addition to their help during the design phase, Window Consultants has also been very easy to work with regarding hidden field conditions, addressing them in a manner that is professional and satisfies the client as well as us, the architect.

We have had the pleasure of receiving awards from the Associated Builders and Contractors while working with Window Consultant's on a window replacement project and a systemic renovation project.

Thank you for your commitment to supporting good designs and being available for technical guidance on projects with Baltimore County Public Schools, Baltimore City Public Schools, Hospitals and Universities over these past nine (9) years. We look forward to future successful projects with Window Consultants.

Sincerely,

Brian Weisgerber
